

WORKPLACE HEALTH & SAFETY

Workplace health & safety

Our workplace health and safety policy enable us to maintain the ideal working atmosphere for our staff. Everyone who works there has an entitlement to feel secure. Our business is dedicated to upholding the law and establishing a safe working environment.

It is the duty of each team manager to carry out this policy for health and safety. Regulations on safety and security should be followed, and violators would be held responsible. In the event that an employee repeatedly violates health and safety regulations, we will impose disciplinary measures that could lead to their dismissal.

Everyone must do their part to ensure a safe and healthy environment.

All potential and present members of staff, as well as customers, suppliers, and consultants, are subject to the terms of this occupational / workplace safety and health regulation. We are committed to:

- consistently providing a secure work environment by recognizing and reducing or eradicating risks in the workplace and lowering occupational hygiene and safety risks.
- consistently providing a safe and healthy work environment by identifying and mitigating or eradicating risks in the workplace and lowering occupational health and wellness risks.
- The management of health and safety concerns associated with job operations.
- establishing and upholding procedures for the secure usage, management, preservation, and transportation of objects and materials.

Our goal is to provide a safe and healthy work environment that is free from workplace injury and illness. This will only be achieved through the participation, co-operation and commitment of everyone in the workplace.
